

Energy-saving operation Starvert iG5A

Group	Display	Parameter name	Setting	Range	Default	Unit
Function group 1	F40	[Energy-saving operation]	-	0 ~ 30	0	%

- Set the amount of output voltage to be reduced in F40.
- Set as the percent of Max output voltage.
- For fan or pump applications, energy consumption can be dramatically reduced by decreasing the output voltage when light or no load is connected.
